# Enterprise Introduction

Zhejiang Shuntong Electric Co.,Ltd. is a professional manufacturer specializing in R & D, production and sales. The company has passed ISO9001: 2000 quality management system standard requirements certification. Specializing in industrial alarm, communication, lighting, aviation warning etc. Independently developed products are widely used in iron and steel metallurgy, telecommunications towers, lifting machinery, engineering machinery, ports and terminals, transportation, wind power generation, and ocean shipping. The company now has more than 20 professional and technical personnel, becoming one of the professional suppliers in this field, and has won wide recognition from customers.

Let everyone work safely, and let their families and people around them live a healthy life , provide safety warnings and security for people in high-risk areas of work, committed to R & D, design and manufacture of high-reliability industrial alarms, industrial lamps, industrial communication, industrial sensing, personal protection and other products.

Only if we master the most precise engineering technology can we provide the highest quality products and let everyone work in a safe environment. Taking the task of "providing safety warnings for heavy industry, steel, mining, ports and terminals, wind power and other fields", we believe that our products play a vital role for workers all over the world.

The company follows the market-oriented, customer-centric, and integrity-based principles to ensure quality and cost reduction, improve management and efficiency, and to benefit customers with low prices and good quality. The company will wholeheartedly provide users with quality products and satisfactory services. Is willing to work with our customers to build the "Shuntong" brand and create a brilliant tomorrow.

## AUDIBLE & VISUAL ALARM

### Product Introduction

Audible and visual alarm is a kind of alarm signal device used in dangerous places to send out warning signals to people through sound and lights. When an emergency situation such as an accident or fire occurs at the production site, the control signal sent by alarm controller activates the alarm circuit to send out sound and light alarm signals to complete the alarm purpose. The alarm shell is made of stainless steel, the lamp shell has strong impact resistance, 180° clearly visible super bright LED light-emitting tube, equipped with super buzzer, stable work, long service life, low power consumption, and not affected by pollutants and water.

### Application field

Iron and steel metallurgy, telecommunications towers, cranes, construction machinery, ports, transportation, wind power, ocean-going ships etc.

### Installation Matters

- (1) The installation height of the alarm should be above 180cm for the maintenance personnel to carry out daily maintenance.
- (2) The alarm is a safety instrument with sound and light display functions. It should be installed in a place where personnel can easily see and hear.
- (3) No strong electromagnetic fields (such as high-power motors, transformers) around the alarm.
- (4) Cut off the power before installation to prevent burn out alarm.
- (5) Check whether the power supply is consistent with the rated voltage of the alarm.
- (6) Make sure the wiring is accurate before turning on the power (DC should be distinguished between positive and negative).
- (7) Ensure the alarm is well grounded.
- (8) When installing, the warning light should face upwards and use expansion screws for wall mounting.

### Maintenance

- (1) Regularly check the performance of the sound and light alarm when in use. If damaged, it should be repaired by professionals.
- (2) Clean the dust regularly and check the working status.
- (3) When the temperature is low, drip some lubricating oil on the rotating part.

### Operation & Use instructions

**Wiring:** The audible and visual alarm is a two-wire connection.

Brown / Red ----- Live wire / +

Blue / Black ----- Neutral wire / -

According to the working voltage provided by the real object, the red color of DC is "+", the black is "-", and the positive and negative poles of AC are not divided. Working mode: power on, the horn sounds, and the warning light flashes. Grounding: There is a "  " grounding sheet at the bottom of the sound and light alarm. Use solder wire to weld the ground wire and the ground sheet to ensure that the sound and light alarm is well grounded. Or use a grounding wire to wind and fix the screw of the grounding plate, and then tighten the screw of the grounding plate to ensure that the sound and light alarm is well grounded.

## STSG-01

### Functions and features

1. With volume and type adjustment switch, simple to use, continuous work for a long time.
2. Special integrated chip design, super electromagnet anti-interference performance.
3. The inner core of the flash lamp is an LED tube, which is made of the characteristics of a single-chip microcomputer. The number of flashes per second can be determined according to customer requirements.
4. The shell is made of aluminum alloy die-casting, which can effectively resist salt spray corrosion and has good waterproof, moisture-proof and shock-proof functions.
5. Conventional 3 kinds of alarm sounds, siren sound, fire sound, and ambulance sound. The sound can be customized.

### Parameters

|   |                                |                  |                       |

| Net weight | 1.5kg      | Voltage          | DC12V/24V AC220V/380V    |
| Decibel    | 100dB      | Color(Lamp)      | Red Yellow Blue Green    |
| Power      | 10W        | Dimension        | 86(L) × 70(W) × 233(H)mm |

Application field: Suitable for safety signal devices of expressways, road junctions, underground tunnels and cranes.

## STSG-200

### Functions and features

1. Double speaker electronic buzzer with loud alarm sound.
2. Made of ABS engineering plastic, light weight and anti-corrosion.
3. Alarm light core is LED tube, warning light flashing times can be customized.

### Parameters

|            |                            |                  |                       |
|------------|----------------------------|------------------|-----------------------|
| Model      | STSG-200                   | Sound frequency  | 800Hz ( Tone D )      |
| Decibel    | 106~120dB                  | Protection grade | IP56                  |
| Net weight | 1.85kg                     | Color(Lamp)      | Red Yellow Blue Green |
| Frequency  | 50/60Hz                    | Voltage          | DC12V/24V AC220V/380V |
| Power      | 10~25W                     | Material         | Shade: ABS Lamp: PC   |
| Dimension  | 250(L) × 210(W) × 320(H)mm |                  |                       |

Application field: Suitable for safety signal devices of expressways, road junctions, underground tunnels and cranes.

## STSG-808

### Functions and features

1. LED flashing light source, high-brightness flashing, 100 times/min.
2. Built-in 5 kinds of voices, 3 kinds of alarm tones can be selected, wide application range.
3. Intelligent sound and light alarm with adjustable volume.
4. The lampshade is made of PC material, good light transmission, UV resistance and aging resistance.

### Parameters

|            |   |                  |                       |
|------------|---|------------------|-----------------------|
| Model      | STSG-808                                    | Power            | 20W                   |
| Decibel    | 90~114dB                                    | Protection grade | IP56                  |
| Net weight | 1.2kg                                       | Color(Lamp)      | Red                   |
| Frequency  | 10/20Hz                                     | Voltage          | DC12V/24V AC220V/380V |
| Material   | Shade: ABS Lamp: PC                         |                  |                       |
| Dimension  | 120(L) × 120(W) × 257(H)mm                  |                  |                       |
| Tone       | Siren sound, other tones can be customized. |                  |                       |

Application field: Suitable for safety signal devices of expressways, road junctions, underground tunnels and cranes.

## STSG-06

### Functions and features

1. This product has 6 voices and 1 alarm sound.
2. The shell is made of high-quality steel die-casting, effectively resist salt spray corrosion, rainproof and dustproof.
3. With voice and volume adjustment switches, the operation is simple and convenient.

### Parameters

|                  |  |                  |                            |
|------------------|--|------------------|----------------------------|
| Model            | STSG-06  | Frequency        | 50/60Hz                    |
| Current          | 1.5A   | Protection grade | IP56                       |
| Net weight       | 5.1kg  | Voltage          | AC220V/380V                |
| Decibel          | 110dB  | Color(Lamp)      | Red                        |
| Power            | 25W  | Dimension        | 230(L) × 190(W) × 400(H)mm |
| Contact capacity | 24V~380V DC/AC   | Material         | Shade: steel Lamp: PC      |
| Tone             | Alarm sound, air defense sound, engineering sound, voice prompt. |                  |                            |

Application field: Suitable for safety signaling devices of large and medium-sized cranes and ships, terminal conveying equipment in port machinery, electromechanical industries, expressways, underground tunnels and cranes.

## STSG-07

### Functions and features

1. This product has 6 voices and 1 alarm sound.
2. The shell is made of high-quality steel die-casting, effectively resist salt spray corrosion, rainproof and dustproof.
3. With voice and volume adjustment switches, the operation is simple and convenient.

### Parameters

|                  |  |                  |                            |
|------------------|--|------------------|----------------------------|
| Model            | STSG-07  | Frequency        | 50/60Hz                    |
| Current          | 3A   | Protection grade | IP56                       |
| Net weight       | 5.1kg  | Voltage          | AC220V/380V DC24V/48V      |
| Decibel          | 120dB  | Color(Lamp)      | Red                        |
| Contact capacity | 24V~380V DC/AC 1.5A  | Dimension        | 183(L) × 190(W) × 385(H)mm |
| Power            | 20w、30w、60w、80w、100w   | Material         | Shade: steel Lamp: PC      |
| Tone             | Alarm sound, air defense sound, engineering sound, voice prompt. |                  |                            |

Application field: Suitable for safety signaling devices of large and medium-sized cranes and ships, terminal conveying equipment in port machinery, electromechanical industries, expressways, underground tunnels and cranes.

**STSG-YH-07**

**Functions and features**

1. This product is an upgraded version of 07, with large speakers and louder sound.
2. This product has 6 voices and 1 alarm sound.
3. The shell is made of high-quality steel die-casting, effectively resist salt spray corrosion, rainproof and dustproof.
4. With voice and volume adjustment switches, the operation is simple and convenient.

**Parameters**

|                  |  |                  |                            |
|------------------|--|------------------|----------------------------|
| Model            | STSG-YH5-07  | Frequency        | 50/60Hz                    |
| Current          | 3A   | Protection grade | IP56                       |
| Net weight       | 5.1kg  | Voltage          | AC220V/380V DC24V/48V      |
| Decibel          | 130dB  | Color(Lamp)      | Red                        |
| Contact capacity | 24V~380V DC/AC 1.5A  | Dimension        | 183(L) × 220(W) × 385(H)mm |
| Power            | 20w、30w、60w、80w、100w   | Material         | Shade: steel Lamp: PC      |
| Tone             | Alarm soun, air defense sound engineering sound, voice prompt. |                  |                            |

Application field: Suitable for safety signaling devices of large and medium-sized cranes and ships, terminal conveying equipment in port machinery, electro mechanical industries, expressways, nderground tunnels and cranes.

**STSG-KGL-156**

**Product description**

STSG-KGL-156 switch signal alarm is a new product developed by our company according to the actual requirements of customers. This product detects abnormal conditions through external equipment, outputs a switch alarm signal, automatically triggers the alarm, and the alarm uses sound and light to alarm, which is timely and effective.

**Features**

1. The product can be connected to 9 external devices at the same time, if other quantities are required, it can be customized.
2. The product has 9 voices, and each external device is connected to one voice.

**Parameters**

|             |  |                  |                            |
|-------------|--|------------------|----------------------------|
| Model       | STSG-KGL-156   | Frequency        | 50/60Hz                    |
| Color(Lamp) | Red  | Protection grade | IP56                       |
| Net weight  | 5.8kg  | Voltage          | AC110V/220V/380V DC12V/24V |
| Decibel     | 120dB  | Dimension        | 150(L) × 160(W) × 345(H)mm |
| Material    | Shade: steel Lamp: PC  |                  |                            |
| Tone        | Alarm sound, air defense sound, engineering sound, voice prompt. |                  |                            |

Application field: Suitable for safety signaling devices of large and medium-sized cranes and ships, terminal conveying equipment in port machinery, electromechanical industries, expressways, underground tunnels and cranes.

**STSG-08**

**Functions and features**

1. This product has 6 voices and 1 alarm sound.
2. The shell is made of high-quality steel die-casting, effectively resist salt spray corrosion, rainproof and dustproof.
3. With voice and volume adjustment switches, the operation is simple and convenient.
4. Warning lights include rotating incandescent lights and LED strobe lights.

**Parameters**

|             |  |                  |                            |

| Color(Lamp)      | Red,yellow,blue     | Voltage   | DC12V / 24V , AC36V / 110V / 220V / 380V |       |
| Contact capacity | 24V~380V DC/AC 1.5A | Material  | Aluminum alloy                           |       |
| Protection grade | IP56                | Dimension | 250(L) × 220(W) × 480(H)mm               |       |
| Net weight       | 5.5kg               |           |  |       |

Application: Suitable for safety signaling devices of large and medium-sized cranes and ships, terminal conveying equipment in port machinery, electro mechanical industries, expressways, underground tunnels and cranes.

## SHD2L

### Functions and features

1. This product has 6 voices and 1 alarm sound.
2. The shell is made of aluminum alloy die-casting, effectively resist salt spray corrosion, rainproof and dustproof.
3. Double speaker design, the sound is louder.
4. With voice and volume adjustment switches, the operation is simple and convenient.

### Parameters

|   |  |                  |                                |
|---|--|------------------|--------------------------------|
| Model   | SHD2L  | Frequency        | 50/60Hz                        |

## DWJ-10

### Features

1. With a small speaker, the sound is loud and clear.
2. High-quality transparent lampshade, using high-quality PC material, waterproof and dustproof.
3. Install the base with bolts, install and fix to prevent vibration.

### Parameters

|             |                     |           |  |
|-------------|---------------------|-----------|--|
| Model       | DWJ-10              | Decibel   | 110dB                                    |
| Color(Lamp) | Red ,yellow         | Dimension | 190(L) × 190(W) × 316(H)m                |
| Net weight  | 0.95kg              | Voltage   | DC12V / 24V , AC36V / 110V / 220V / 380V |
| Material    | Base: ABS Shade: PC |           |  |

## BC-809

### Features

1. High-brightness flashing, loud alarm sound and optional tone.
2. The lampshade is made of PC material, which has good light transmission, UV and aging resistance.
3. The warning light has two pulse flashing modes: xenon lamp and LED tube.
4. Three installation methods: screw fixation, strong magnetic adsorption, flange installation.

### Parameters

## FI4870

### Functions & Features

1. Using a new red LED light source, strong brightness, visible distance above 4800 meters, thick smoke and fog penetration of 300 to 500 meters.
2. Using programmable IC to control the circuit board, switch between Sound & Light and Sound modes.
3. Adopt high-energy non-memory battery, with good charging and discharging performance, high capacity, can work continuously for 15 hours after a one-time full charge.
4. The bottom is a strong magnetic base, which can be directly attached to the iron plate, which is convenient to use.
5. Imported PC material enhances the impact of the alarm and prolongs its service life.

### Use

1. When in use, the first time press the switch button of the lamp, it is Sound & Light mode; the second time is Sound mode; the third time it stops working.
2. After a full charge, it can be used at any time within 3 months; if it is stored for a long time, it needs to be charged every 4-5 months. In use, when the power is exhausted, the brightness of the warning light will be sharply reduced or stop working, so stop using it and charge it in time.
3. The charger has a built-in charging protection device. When the charger is powered on but not charging, the indicator light is green. When the alarm is connected for charging, the indicator light is red. When fully charged, the indicator light is green.

### Application

Suitable for warning signs in various special places, signal contact and direction indication for municipal, construction work and guardianship, ambulance and emergency personnel.

### Parameters

| Model      | STJD90B | Frequency        | 50/60Hz                      |
| Net weight | 0.4kg   | Protection grade | IP56                         |
| Decibel    | 120dB   | Voltage          | DC12V / 24V , AC220V / 380V  |
| Color      | Red     | Dimension        | 85(L) × 85(W) × 140/200(H)mm |
| Current    | 0.18A   | Material         | Base: ABS Shade: PC          |

Application: Suitable for road construction, railway isolation, traffic construction warning etc.

**PLUM BLOSSOM WARNING LIGHT**

**Features**

1. PC plastic shell, good light transmission and dust resistance.
2. Deep red switch button, simple and convenient.

**Parameters**

|   |                             |            |                           |
|---|-----------------------------|------------|---------------------------|

| Application: Suitable for road construction, railway isolation, traffic construction warning etc. |                             |            |                           |

**ST-ABC-9**

**Features**

1. The base is made of aluminum alloy, which is anti-corrosion and moisture-proof.
2. PC transparent lampshade, good light transmission, and good warning effect.
3. LED high-brightness light source, flashing frequency 35t/min, strong brightness.

**Parameters**

|  |               |             |                            |
|--|---------------|-------------|----------------------------|
| Model  | ST-ABC-9      | Frequency   | 50/60Hz                    |
| Protection grade   | IP56          | Color(Lamp) | Red                        |

| Decibel  | 120dB         | Dimension   | 113(L) × 125(W) × 215(H)mm |
| Voltage  | DC24V, AC220V | Material    | Base: ABS Shade: PC        |
| Application: Suitable for lifting equipment such as construction machinery (traveling cranes, crawler cranes, tire cranes, etc.), port machinery (gate cranes, bridge cranes, etc.). |               |             |                            |

**SOLAR ALARM**

**Features**

1. High efficiency solar panel, fast charging efficiency.
2. PIR human body induction, automatic light alarm.
3. High-decibel LED light, the light flashes quickly, and the position is clearly distinguished.
4. 4 working modes for selection.

**Parameters**

**STSG-702**

**Features**

1. The upper and lower limit high temperature and low temperature alarm, the temperature can be set.
2. Equipped with screw probe, simple operation and precise measurement.

**Parameters**

|   |                   |                   |                             |
|---|-------------------|-------------------|-----------------------------|
| Product name  | Temperature alarm |                   |                             |
| Net weight  | 1.5kg             | 螺钉探头              | M8*1.2mm*18mm               |
| Decibel   | 90/105dB          | Voltage           | AC220V                      |
| Installation  | Screw fixation    | Dimension         | 20(L) × 10.7(W) × 21.3(H)cm |
| Alarm   | Sound and light   | Temperature range | 0-1200℃                     |
| Material  | ABS               |                   |                             |
| Application: Suitable for electronic equipment, machine tool equipment, medical equipment, restaurants, warehouses etc. |                   |                   |                             |

**LTE-RH203**

**Features**

1. With integrated temperature and humidity sensor, the sensor cable length is 1.5m.
2. Aluminum alloy shell, anti-aging and anti-corrosion.
3. Digital display, temperature and humidity can be set.
4. When the temperature/humidity exceeds the alarm, press the mute button to cancel the sound. When the temperature and humidity return to normal, the button will automatically reset.

**Parameters**

|   |                                |                   |                             |

| Application: Suitable for electronic equipment, machine tool equipment, medical equipment, restaurants, warehouses etc. |                                |                   |                             |

**TIMING ALARM**

**Product description**

- 1.3 timing modes, time can be set freely.  
S: 0.01s ~ 99.99S; M: 1s ~ 99min99S; H: 1min ~ 99h99min
2. It can alarm for single-off and circular timing. Single-off alarm: start the alarm at the set time, press the button to end the alarm. Circular alarm: alarm once at the set time, re-time, continue to alarm, and recycle.
3. The button is used to start and pause, and can be changed to a self-resetting type.
4. With memory function, the time only needs to be adjusted once.

**Parameters**

|   |                   |            |                             |

| Decibel   | 105dB             | Voltage    | AC220V                      |
| Frequency   | 50/60Hz           | Dimension  | 14(L) × 10.9(W) × 20.9(H)cm |
| Mechanical life   | ≥ 1 million times | Net weight | 0.65kg                      |
| Application: Suitable for electronic equipment, machine tool equipment, medical equipment, restaurants, warehouses etc. |                   |            |                             |

**GST-HZ-M8503**

**Product description**

GST-HZ-M8503 fire alarm is a kind of sound and light alarm equipment installed on the scene. The alarm receives the signal and sends out a strong sound and light alarm signal, which has reached the purpose of reminding people on the spot. 3 kinds of alarm sounds are adjustable.

**Alarm principle**

Adopt the principle of resonance. A buzzer film is installed on the vocal cavity, which causes the buzzer film to vibrate after power-on, causing the vocal cavity to resonate.

**Speak**

Composed of buzzer, pronunciation cavity, and pronunciation cavity cover.

**Parameters**

|                      |                         |                     |                          |
|----------------------|-------------------------|---------------------|--------------------------|
| Product name         | GST-HZ-M8503 fire alarm |                     |                          |
| Voltage              | DC24V                   | Current             | 30mA                     |
| Flash frequency      | 1.1Hz~1.7Hz             | Material            | ABS                      |
| Decibel              | 80~110dB(3m)            | Pitch change        | 2s~4.5s                  |
| G.w.                 | 0.6kg                   | Dimension           | 11.7(L) × 5(W) × 16(H)cm |
| Hole distance        | 66.7mm                  | Ambient temperature | -10℃~+50℃                |
| Environment humidity | ≤95%RH 40℃              |                     |                          |

**Product description**

The alarm shell is made of aluminum alloy shell, the lamp shell has strong impact resistance, 180° clearly visible ultra-bright LED light-emitting tube, equipped with a super buzzer, stable work, long service life, low power consumption, not affected by pollutants and water.

**Applicable place**

Explosion-proof audible and visual alarms are mainly used in dangerous places with explosive gas mixtures: Zone 1, Zone 2 Class IIA, IIB, IIC, and the temperature group is T1~T6 inflammable and explosive places. It is suitable for hazardous locations such as chemical plants, gas stations, petroleum extraction and refining, mines, laboratories, and docks. The alarm can emit sound and light signals at the same time.

**Product Standards**

GB3836.1—2000 Electrical Equipment for Explosive Gas Atmosphere Part 1: General Requirements";  
 GB3836.2-2000 Electrical Equipment for Explosive Gas Atmosphere Part 2: Flameproof 'd';  
 GB3836.4-2000 Electrical Equipment for Explosive Gas Atmosphere Part 4: Intrinsically Safe 'i'".

**Features**

1. Aluminum alloy shell, high-voltage electrostatic spray on the surface.
2. Good insulation performance, sturdy shell and anti-aging.
3. Super thick tempered glass, high impact resistance.

**BBJ**

**STJD-10-24V**

**Product description**

STJD-10-24V type explosion-proof audible and visual alarm is designed with special integrated circuit, which is stable in operation and long in service life. It uses super bright light-emitting tube inside, which has the characteristics of small size, loud sound, light weight and low price. It is suitable for node type combustible gas series and point type toxic series gas detectors and other detectors and alarms with node output. Explosion-proof mark: Exd II CT6 Gb

**COMBUSTIBLE  
GES ALARM**

**Product description**

The combustible gas alarm is composed of a detector and an alarm control host. It is widely used in petroleum, gas, chemical, oil depots and other petrochemical industries where there are toxic gases. It is used to detect leakage in indoor and outdoor dangerous places and is an important instrument to ensure production and personal safety. When there is a toxic gas in the place under test, the detector converts the gas signal into a voltage signal or current signal and transmits it to the alarm instrument, and the instrument displays the percentage concentration value of the lower limit of the toxic gas explosion. When the concentration of toxic gas exceeds the alarm setting value, an audible and visual alarm signal will occur, and the personnel take safety measures in time to avoid explosion accidents.

**Installation**

The density of the measured gas is different, and the installation position of the indoor probe should also be different. When the measured gas density is less than the air density, the probe should be installed 30cm away from the roof with a downward direction; otherwise, the probe should be installed 30cm away from the ground with an upward direction.

# MOTOR SIREN

**Product Introduction**

The motor alarm is made of special aluminum alloy material, processed by heat treatment, and has strong moisture and corrosion resistance. No jamming, no crash, no deformation, anti-wind and sand, anti-bird nesting. Quick start, stable operation, strong sound penetration and large coverage.

**Application**

Used for civil defense alarm systems; natural disaster alarms; alarm systems for mines, blasting, prisons, reservoirs, power stations, substations, airports, police stations and military bases; emergency alert system of factories, schools, docks, warehouses, public buildings, commercial district and residential area.

## ELECTRIC SIRENS

### Features

1. Special aluminum alloy material, heat treatment processing, strong moisture and corrosion resistance;
2. No jam, no crash, no deformation, anti-wind and sand, anti-bird nesting;
3. Quick start, stable operation, loud sound source, strong penetrating power;
4. The vertical series comes with a rain cap;
5. The protection grade is IP55, and the explosion-proof grade is Exd II BT4.

### Application

1. Used in war and civil defense alarm systems ;
2. Used in mines, blasting, prisons, reservoirs, power stations, substations, airports, police stations, military bases etc.
3. Used for earthquakes, tsunamis, floods, mudslides, landslides, typhoons, fires, minefields, and forest fire prevention;
4. Used in factories, schools, docks, warehouses, public buildings, commercial areas, residential areas, ports etc.

**LK-SCT**

**Features**

- 1.High frequency: 700HZ-1700HZ alarm sound is easy to distinguish from environmental noise, clear, harsh and sharp;
- 2.Strong compatibility  
It can be connected with smoke detectors, gas sensors, infrared sensors, liquid level sensors, timers, and various sensors of anti-theft and alarm systems;
- 3.Application  
Factories, schools, radio stations, automobiles, trains, ships, airports, ports, crossings, platforms, silver buildings, hospitals, residential areas, shopping malls, warehouses, hotels, troops, factory buildings, mining industries, port gates, etc.

**ST-SV**

**Features**

- 1.High frequency:700HZ-1700HZ alarm sound is easy to distinguish from environmental noise, clear, harsh and sharp;
- 2.Strong:compatibilityIt can be connected with smoke detectors, gas sensors, infrared sensors, liquid level sensors, timers, and various sensors of anti-theft and alarm systems;
- 3.Application:Factories, schools, radio stations, automobiles, trains, ships, airports, ports, crossings, platforms, silver buildings, hospitals, residential areas, shopping malls, warehouses, hotels, troops, factory buildings, mining industries, port gates, etc.

**Parameters**

# EXPLOSION-PROOF ELECTRIC SIRENS

**Features**

1. The protection level is IP55, and the explosion-proof level is Exd II BT4;
2. Special aluminum alloy material, heat treatment processing, strong moisture and corrosion resistance;
3. No jamming, no crash, no deformation, anti-wind and sand, anti-bird nesting;
4. Quick start, stable operation, strong penetrating power, and large sound coverage.

**Application**

In flammable and explosive emergency alert systems such as oil fields, chemical plants, gas stations, and oil depots.

# HAND-CRANK SIREN

**Product description**

The principle of the traditional alarm is to use a vibration sensor, once the sensor receives the vibration signal, it will automatically alarm. Hand-crank siren does not require a power source, and can provide an effective alarm in places without power support. By manually rotating the crank, it is accelerated step by step through the transmission of the gear box, and then the ringing wheel is driven to run at high speed through the transmission block. In the process of high-speed operation of the ringing wheel, the absorbed air produces high-speed and high-pressure resonance, which is simultaneously extruded to the fixed window of the fixed wheel, thereby acting as an alarm. Hand-crank siren is small in size, light in weight, easy to carry and install and does not require any tools. It only needs an area of 0.15 square meters and a place where people stand to operate normally, and the mobile operation is very strong.

**Application**

It is mostly used for emergency warning of emergencies. Its products are easy to carry, and are mainly used for flood control, disaster relief, forest fire protection, military supplies, public and industrial occasions to respond to emergency alarms.

**Use & Maintenance**

1. Only one person is required to operate the hand-crank siren to work normally. When the alarm is working, do not put fingers or other foreign objects into the ringing wheel, otherwise it will cause personal injury or damage the alarm.
2. Minors are prohibited from using hand-crank siren.
3. The sound pressure level at close range can cause permanent deafness. Therefore, always wear earmuffs to protect ears.
4. The use of sirens should comply with the "Air Defense Law" and relevant national sirens use regulations, and should be maintained regularly to keep the sirens in normal working conditions for a long time. If the alarm fails to operate normally, please seek professional repairs.

**Lifting type  
STSY-200L**

**Parameters**

|                    |  |                |                   |

## ELECTRONIC BUZZER/ HORN

### Product description

BC series electronic buzzer adopts the current international advanced electronic product technology and is specially developed for hoisting machinery, door cranes and bridge cranes. The inner core of products adopts advanced special integrated circuit design, with strong anti-interference ability and stable operation; the outer shell is made of aluminum alloy die-casting, which is light in weight, waterproof, shockproof and corrosion resistant. Users can choose the tone and voice alarm mode according to their own use occasions and requirements.

### Features

1. A variety of alarm tones are available.
2. The lamp tube is made of chip light emitting diodes, with a service life of more than 100,000 hours.
3. The horn alarm is made of ABS engineering plastics, and the lampshade is made of PC material, which has particularly good impact resistance, thermal stability and gloss.
4. Special integrated chip design, super electromagnetic anti-interference performance.

### BC-3A

|------------------|--------------------------|-----------------------|--|
| Product name     | DJ-5 Horn alarm          | Voltage               | DC12V / 24V AC36V / 110V / 220V / 380V |
| Net weight       | 2.1kg                    | Power                 | 10W                                    |
| Decibel          | 115dB(A)                 | Material              | Base: Aluminum alloy Horn: ABS         |
| Frequency        | 50/60Hz                  | Dimension             | 17(L) × 17(W) × 24(H)cm                |
| Color            | Horn: Red                | Operating temperature | -30°C ~ +70°C                          |
| Protection class | IP65                     | Humidity              | 10% ~ 90%                              |
| Tone             | A / B / E / D (Optional) |                       |  |

Application: Suitable for lifting equipment such as construction machinery (traveling cranes, crawler cranes, tire cranes, etc.), port machinery (gate cranes, bridge cranes, etc.).

Application: Suitable for schools, squares, factories, urban management street offices, publicity vehicles, etc.

**MULTI FUNCTION  
DEVICE ALARM  
BC-2**

**MULTI FUNCTION  
DEVICE ALARM  
AS210**

**Features**

1. Sound and light synchronous alarm (optional).
2. A variety of alarm tones are optional, and the volume is continuously adjustable.
3. With alarm delay (optional).
4. Can speak and broadcast.
5. A variety of combination configuration methods, flexible and convenient system application.

**Parameters**

|                  |   |            |            |
|------------------|---|------------|------------|
| Tone             | A / B / E can be customized   |            |            |
| Rated impedance  | 8 Ω   | Color      | Horn: Gray |
| Power            | 10 ~ 80W  | Frequency  | 300~6500Hz |
| Decibel          | 106 ~ 110dB(A)  | Net weight | 3kg        |
| Protection class | IP65  |            |            |
| Material         | Aluminum alloy, PE, cold rolled sheet   |            |            |
| Application      | Suitable for schools, squares, factories, urban management street offices, publicity vehicles, etc. |            |            |

**Selection Guide**

| Model  | Configuration |             |   |
|--------|---------------|-------------|---|
|        | MIC           | Speaker     | Tone                                    |
| BC-2B  | Handheld      | 25W/16 Ω *1 | A / B / C, Adjustable tone, alarm delay |
| BC-2C  |               | 25W/16 Ω *2 | A / B / C, Adjustable tone              |
| BC-2F  | Gooseneck     | 25W/16 Ω *1 | A / B / C, Adjustable tone              |
| BC-2Y  |               | 10W/8 Ω *1  | A / B / C, Adjustable tone, alarm delay |
